

# ■ Evacuable Pellet Die Complete

## Evacuable Pellet Die Complete

Production of high quality sample pellets

## Highlights

- Hardened Stainless Steel
- Highly polished pellets
- Evacuable for sample pellet clarity and quality

## Applications

Production of compressed sample disks.

## Information

We provide a wide range of 440C hardened stainless steel Evacuable Pellet Dies, used for compacting powdered samples into disks or briquettes.

The dies are designed for use with the Hydraulic Presses. Halide disks for infrared analysis are usually produced with the smaller size dies. The larger size dies are commonly used in briquetting samples for XRF and XRD analysis and many other industrial applications. All of the dies are equipped with nitrile O-ring seals and an evacuation port to allow for the removal of moisture, if desired, during the pressing process.

## Evacuable Pellet Dies Available

5mm	Evacuable Pellet Die
10mm	Evacuable Pellet Die
13mm	Evacuable Pellet Die
20mm	Evacuable Pellet Die
32mm	Evacuable Pellet Die
40mm	Evacuable Pellet Die
32mm	Lightweight Evacuable Pellet Die
40mm	Lightweight Evacuable Pellet Die
